

Let It Go

The Neighbourhood

I'm from a a little city with expensive taste,
Where the cars don't run till the engine breaks,
Wasn't spending pennies on the massive things
But them faster the mess with this recipe,
Could've quite see, what the future held,
And this days went by it would tell itself
Let this trouble just a little bit more,
Let this struggle just a little bit more.
Remember what the people said,
Remember what the people said

When it's said and done, let it go!
Remember what the people said,
Remember what the people said
When it's said and done, let it go!
Shouldn't try to fix it if it keeps getting better
Let it go, forget it forever and ever and ever
Don't ever resign a letter, inside the single word
Written a little change could
Pay lanes with the right vision
Couldn't tell what would happen next

But his weeks went by, no what turned the best,
Let this struggle just a little more
Let this struggle just a little more, mhm
Remember what the people said,
Remember what the people said
When it's said and done, let it go!
Remember what the people said,
Remember what the people said
When it's said and done, let it go!

If what they said is all pretended
It will be their friend
If it depend it on anyone was listening
And I was listening
And when they said that all I wanted was a...
I had to turn it other chick but I was listening
Yeah I was listening, listen into all,
Remember what the people said,
Remember what the people said
When it's said and done, let it go!

Remember what the people said,
Remember what the people said
When it's said and done, let it go!
Remember what the people said,
Remember what the people said
I wasn't listening, I wasn't listening, listening it all
Remember what the people said,
Remember what the people said
I wasn't listening, I wasn't listening, listening it all, it all
