

What Then?

The Nerve Agents

How much longer... can we keep up?
Before we run out of weapons
To fight the plagues to come?
For every virus, we seem to have a pill to pop
But what then, what then, what then...
When the virus, assimilates to all we've got?

Will we keep up?
And if not...
What then... what then... what then...?

In our defense, are we creating... aiding...
An evolution of some super virus...
Poised to wipe us out?
A spear to the animal,
That threatens us?

Or just... fucking insanity...
Is this all just insanity
Domination, control we seek...
Or survival instincts?
What am I supposed to think?
Well what?
