Turn Out The Light

The New Amsterdams

I know that it burns like poison in the pill
Sing me to sleep, echoes in the hills
You can't hear a word
You can't hear my broken will

The world through a windshield is careless and cheap
I toss and I turn, I can't get to sleep
Counting the hours the days that turn into weeks

I've been wrong but it's alright
There've been long and lonely nights
I was lost till I found you
Turn out the light, I'll stay if you want me to

Somehow my time got out of my hands
I just wanna stop master commands
I'm telling you true it won't be this way again

Long ways away but you're never alone
Look at the sky over our home
I'll be around a few more miles to go

I've been wrong but it's alright
There've been long and lonely nights
I was lost till I found you
Turn out the light, I'll stay if you want me to

Don't have to say it you don't have to speak
I've been awake worried and weak
Don't say a word

I've been wrong but it's alright
There've been long and lonely nights
I was lost till I found you
Turn out the light, I'll stay if you want me to
