

There are things I'd like to say
Always lead me back to that day
There are things I've thrown away
I could soak up all of you've say

Are you so far from here?
Are you so far from here
'Cause I'll never ever lead you again?

Things that struck me once
Said away from here
Away from here

Things that struck me once
Said away from here
Away from here

There are things I'd like to say
Always lead me back to that day
There are things I've thrown away
I could soak up all of you've say

Are you so far from here?
Are you so far from here
'Cause I'll never ever lead you again?

Things that struck me once
Said away from here
Away from here

Things that struck me once
Said away from here
I'll always think of that day

Soaked up all the good things
No one's happy that day
Soaked up all the good things
Think what happened that day

There are things I'd like to say
Always lead me back to that day
There are things I've thrown away
I could soak up all of you've say

Are you so far from here?
Are you so far from here
'Cause I'll never ever lead you again?

Things that struck me once
Said away from here
Away from here

Things that struck me once
Said away from here
I'll always think of that day

Soaked up all the good things

No one's happy that day
Soaked up all the good things
Think what happened that day

Soaked up all the good things
Think what happened that day
Soaked up all the good things
Finish it happened that day
