

Busy Tonight

The Nylons

Are you busy
Baby are you busy tonight
Are you busy
Baby are you busy tonight
Are you busy
Please don't be busy tonight

I've been waiting while the whole world gets to you
I've been patient got my place in line
I know you love me but you don't know you do
How can you tell if you won't give it some time

Let me make your mind up
Hold you till my time's up
Baby don't you tell me that you're busy tonight
Say you've got a fever
Say you need a breather
But baby please don't be busy tonight

Can you forget all the others you've known
We'll make this turn out right
We'll close the door on a world of our own
And the heat of our love will light up the night

Let my love surround you
Now that I have found you
Baby don't you tell me that you're busy tonight
Give them any reason
Say you're out of season
But baby please don't be busy tonight, tonight

When you're around I feel you watching me
Your eyes are saying you're still unsure
Why be afraid of something that's just got to be
Give me a chance to make you feel secure

Let me make your mind up
Hold me till my time's up
Baby don't you tell me that you're busy tonight
Say you've got a fever
Say you need a breather
But baby please don't be busy tonight (tonight) tonight

The heat of our love will light up the night

Let my love surround you
Now that I have found you
Baby don't you tell me that you're busy tonight
Give them any reason
Say you're out of season
Oh baby please say you're busy
Busy with me tonight
Oh tonight
Oh tonight

Are you busy
Baby are you busy tonight

Are you busy
Baby are you busy tonight
