

Go With It

The Nylons

I know the way you see it
In denial and you won't believe it
You take the easy way
What good is up without the meaning?
I could never go for that
It's something I'd never do
What about you; could it be you
All caught up in the heat of the moment
Maybe baby, maybe you'll see
What you mean, mean to me
Someday, eventually
Since you went away
It's all I can do gettin' through the day
Told me to go with it, go with it baby
Now it don't matter what I do
Something is leading me back to you
I'm gonna go with it, go with it baby
It's not the way you planned it
All gone wrong and you just can't take it
You thought you had control
Of everything you were gettin' into
But things didn't go like that
When you ran into me
'cause that is when your love had a meaning
I never wanna give up the feeling
Chorus
Just go with it
Baby just go with it
