Just When I Needed You

The Nylons

Life was so sure, love was so new
And I was so lost inside of me
But somehow you'd be right next to me
Just when I needed you

I had my dreams and you lived them too
And sometimes it got so hard to do
But you always be right there for me
Just when I needed you

So I know what it means to have everything you want
And I know what it means to lose it all
But I don't dare think what my life
Would be like without you

Now I'm so sure and love still feels new
And I'm no longer lost inside of me
Oh yeah, and guess who I find, right by my side
Just when I needed you, yeah yeah, just when I needed you

Needed you
