

## Dance Electric

The Pointer Sisters

I can feel the power surging underneath the wires  
It's calling us, urging to come into the fire  
There's a chain reaction when the music hits the streets  
It's a transformation of current into body heat

Dance electric, you are the power, let the energy flow  
Come on and dance electric, baby  
Let yourself go

Dance electric, we're gonna shower sparks  
All over the night  
Dance electric, join in this dance electric  
Come on and dance

There's a red hot circuit in the heart of the machine  
And the force that's working it is taking over you and me  
Then it synchronizes every movement that we make  
When the voltage rises, we let all the circuits break

Dance electric, you are the power, let the energy flow  
Come on and dance electric, baby  
Let yourself go

Dance electric, we're gonna shower sparks  
All over the night  
Dance electric, join in this dance electric  
Come on and dance

There's a chain reaction when the music hits the streets  
It's a transformation of current into body heat

Dance electric, you are the power, let the energy flow  
Come on and dance electric, baby  
Let yourself go

[?] dance electric, we're gonna shower sparks  
All over the night  
Dance electric, join in the dance electric  
Come on and dance

Dance electric, you are the power, let the energy flow  
Come on and dance electric, baby  
Let yourself go
