

Band Of Brothers

The Poodles

I've come along, long way
To the point I am today
And I've always been in a band of brothers
Not ashamed what I've become
Though regrets I do have some
It's impossible to live without mistakes

All the friends I have known
And beauty I have seen
You live inside of me now
I'm here to set you free
Into the light
Whatever lies ahead now
I must be strong carry on
To live the life that's given
Out of the night
Whatever lies behind now
I will be strong carry on
My heart will move along

Quick is the word and action's sharp
What I know I learned by heart
What we started here will be followed by many
I tried so hard to keep my faith
That a break would come my way
Now I'm standing here I won't let it slip away

Outside the world is calling
Waiting for me to take the change
I walked across the line
I've come to take what's mine

Into the light
Whatever lies ahead now
I must be strong carry on
To live the life that's given
Out of the night
Whatever lies behind now
I will be strong carry on
My heart will move along
