

# Miracle

The Poodles

To reach for your innermost dream is not to live in a lie  
The fools all around think they know and try to make us deny  
It's better to burn than to fade, we got to start the fire  
Dance on the ashes of pain we'll never feel more alive

No more time to waste here  
Nothing's too good to be true  
Now it's time to face it  
We got to live and let die

I know you hope for a miracle,  
But we got to fight to survive  
Sometimes life's not comparable  
To the image we're keeping inside  
Can't put my trust in a savior  
To come along in my life  
Salvation comes from inside, like a miracle

When the puzzles of life take their toll the target's so far away  
Flat on your face, bite the dust; the dividend of the day  
The visions you had in your heart don't let them die in their sleep  
There's no reprieve to a dream, get up, get back on your feet

No more time to waste here  
Nothing's too good to be true  
Now it's time let's face it  
We got to live and let die

I know you hope for a miracle,  
But we got to fight to survive  
Sometimes life's not comparable  
To the image we're keeping inside  
Can't put my trust in a savior  
To come along in my life  
Salvation comes from inside, like a miracle
