Lady Friend

The Posies

Here it comes again, it's going to happen to me Here it comes, I should have learned to duck She's going to say, she's going away And I will have to live without her and survive

Here it comes, it looks just like the last wave I drowned in Here it comes, and I'm so far from shore She's going to go, and take her trinkets And I will have to live without her and survive

Here it comes again, the night is going to fall Here it comes, she's going to say good-bye She's going to go, and leave only me And I will have to live without her and survive
