

# All Light Up

## The Pretty Things

All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up

Revolution sixty-nine,  
I was there, it felt fine

Paris riots, sixty-eight  
Dropped a tab and got there late

All light up, all light up

Charlie Manson, drugged on hate  
Took the life of fair Sharon Tate

Martin Luther, human rights  
Got spurted through the night

All light up, all light up

All light up, all light up  
All light up, all light up

Summer concert, high on grass  
Never knew it wouldn't last

Watch the kids in Vietnam  
Lightin' up for Uncle Sam

All light up, all light up  
All light up, all light up

All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up  
All light up, all light up

All light up, light up  
All light up, light up  
All light up, light up  
All light up, light up
