

All About You

The Psychedelic Furs

Now the time is almost done
The race for last is almost run
And almost paid

From where I stand, I've got a view
Over all the miles of you
Where I wait

I know what's true
All about you

Through my window there's a sound
There's a face in every crowd
A lot like you

Is what you wanted, what you took?
All the lies that leave you shook
Leave me cold

I know what's true
All about you

Someone's knocking at my door
Down my stairs, I hear you call
But I won't wake

The seconds move the time along
And all my silence seems so long
But I don't break

I know what's true
All about you

I know what's true
All about you

I know what's true
All about you
