In My Head

The Psychedelic Furs

I came pulling all the stops Putting rain on all of this With the sirens in my sleep And her sorrow at my kiss

I can't turn away Hold a hand to when you pray All her vanity and fate Written on her crazy face

Here in my head I hear you say Here in my head I hear you pray

Time is running through Made by others I regret Remember me I hear it said Out of faces I forget

Hope you get up off your feet Shake the dust out of your shoes City lights and all my jazz All my demonstrations too

Here in my head I hear you say Here in my head I hear you pray

Time is what it's made Made by others I regret Remember me I hear it said Out of faces I forget

Here in my head I hear you say Here in my head I hear you pray

Here in my head I hear you say Here in my head I hear you pray
