President Gas

The Psychedelic Furs

You have to have a party
When you're in a state like this
You can really move it all
You have to vote and change

You have to get right out of it Like out of all this mess You'll say yeah to anything If you believe all this but

Don't cry, don't do anything
No lies, back in the government
No tears, party time is here again
President gas is up for president

Line up, put your kisses down
Say yeah, say yes again
Stand up, there's a head count
President gas on everything but roller skates

It's sick the price of medicine Stand up, we'll put you on your feet again Open up your eyes just to check that your asleep again President gas is president gas again

He comes in from the left sometimes, he comes in from the right It's so heavily advertised that he wants you and I It's a real cowboy set, electric company Every day is happy days it's hell without the sin, but

Don't cry, don't do anything No lies, back in the government No tears, party time is here again President gas is up for president

Line up, put your kisses down
Say yeah, say yes again
Stand up, there's a head count
President gas on everything but roller skates

It's sick the price of medicine Stand up, we'll put you on your feet again Open up your eyes just to check that your asleep again President gas is president gas again

President gas
Oh, president gas
President gas
...
