

Let It Burn

The Qemists

These clowns starting blow off the light, so we need to move like it's the lost fight
I've got a choice and I'm taking it, ah, but I'm not gonna sale it (not in a single way)
Yeah, ah, from the back of my mind to the tip of my lips, we do n't need no war (Let it burnaaaah!)

They start the fight, we bring the fog, I guarantee they will be first to choke, face the danger, we're threaten slayers
I've got the image that the whole thing changing, re-arranging, soft and amazing
If you wanna breathe, we have to burn it down
Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn! Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn!

I quicken the wick and ignite the spark, blow the trigger and scheme part for dark
We can no longer keep playing in favors (in their mouths)
If this faith, then this is part of future, we'll make the fame and they get alone to loose
Still we can just sicken and let it burnaaaah
They start the fight, we bring the fog, I guarantee will be first to choke, face the danger, we're threaten slayers
I've got the image that the whole thing changing, re-arranging, soft and amazing
If you wanna breathe, we have to burn it down
Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn! Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn!

Because the fuel is in our mouths, so we could like torch with just a single way
We're the others, we could sap it out (so let it burn away, let it burn away)
Because the fuel is in our mouths, so we could like torch with just a single way
We're the others, we could sap it out (so let it burn away, let it burn away)

Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn! Let it burn!
We could let it off the world in flames
So let it burn! Let it burn!
We could let it all to burn away
So let it burn, let it burnaaah!
