

Something in My Heart

The Queers

There's a place inside of me only you and I can go
And I know when everything gets me down I'm not alone

I guess I'm trying hard to say
that I want you want you every day
When we're together everything's ok

And we run and we run and the road unfolding never ends
But with you by my side you know I'd do it all again

I guess I'm trying hard to say
That I want you want you every day
When we're together everything's ok

You know there's something something
something in my heart (2x)
