

This World Is Dead

The Rabble

THIS WORLD IS DEAD

There's a dark moon rising overhead
And as it does it blacks out all the sun
Can you see the horror as you realise we've got nowhere left to
run

WO OH
WO OH THIS WORLD IS DEAD

Violence and anger break out - suicide is at an all time high
There's nothing left for you to do this planet begins to die

WO OH
WO OH THIS WORLD IS DEAD

But if you ask me what it meant
Personally I'd tell you it's the way it's supposed to be
But what would you expect - anymore any less
A few years back you never gave a shit
So when the sea-bed blankets this country
And the sky is falling down
Your one option left is but to die

DIE

Your thinking back at things you could've done differently
And now you wanna try - but hey don't we all
All of the time simply say we will - false words like heroes fa
ll
This world won't listen anymore

THIS WORLD IS DEAD

FUCKED
