

## Your Father

The Radio Dept.

The fire caught us burning with desire to get out in the open  
My daddy had a camera and he caught a few moments to show them  
The fire took us higher we were hoping to expire  
When you came in with water, with water

We were only kids when we first laid eyes on each other  
Everything was great but you should have warned me about your f  
ather  
At first he took the crap but I soon learned not to even bother  
With your father, with your father

Now that you're away I'm jerking off every day to your memory  
You finding someone else was a real blow, who will defend me?  
I'm drinking every day but try to behave the same way  
I did before but it's hard, it's, oh, so hard

We were only kids when we first laid eyes on each other  
Everything was great but you should have warned me about your f  
ather  
At first he took the crap but I soon learned not to even bother  
With your father, with your father
