

Fangs, fangs, fangs, fangs

We're nothing like they thought we'd turn out to be
Hard to swallow, yeah, that happened naturally
No point deceiving, I think the world should see us for what we
are
For what we really are

Stack up your fears, that shit you'll never need
You've got that spark, I've got this gasoline
We'll watch it burn, watch it ember out
We're on our own now, now, now

Don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them
, let them)
Let em see your fangs

(Fangs, fangs) see your fangs [x2]

The bitter the better, yeah if it's all the same
We're sick of swimming against these tidal waves
Never gonna fit in, living life like we're misfits
That's what we are, that's what we really are

So throw your hands up higher if you're feeling me
And break the mold tonight, do it recklessly
We'll watch it burn, watch it ember out
We're running it now, now, now

Don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them
, let them)
Let em see your fangs (fangs)

(Fangs, fangs) see your fangs [x2]

Never, never let your lights out
Never, never try to hide out
From the world, it's like staring at the sun

So don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them
, let them)
Let em see your fangs

(Fangs, fangs) see your fangs [x2]
