

I Know, Right?

The Red Jumpsuit Apparatus

Looking off into the sky
Suddenly I realize that I'm high
Not on drugs but on your eyes and it feels right

Maybe I'm wrong but it feels right
Don't try to control your heart with your mind
Just let go, and you'll do right
You'll be impressed when they join your flight, right?

Love is a curious thing my friends
You will never understand how much I adore you
You will never know how much I care for you

Tell me in another life
If we never met would I catch a bite
I think so cause you'd catch mine and it feels nice

Maybe I'm wrong but it feels right
It's hard to explain but I can't deny
I want you by my side
I'm becoming obsessed but you don't mind, right?

Love is a curious thing my friends
You will never understand how much I adore you
You will never know how much I care for you
Love is a curious thing my friends
You will never understand how much I adore you
You will never know how much I care for you

It's not a chemical thing
