

My Little Problem

The Replacements

The feeling you're getting is downright depressing
Do you foresee a way out for me
Well it's not my problem to help you solve them
Do you wanna go through it, do you really wanna do it

Don't you wanna be my little problem
Don't you wanna be my little problem
Probably tell your friends you were on a bet
But I'm a man of pieces that you're never gonna mend
Let's put it together, some way, somehow
Something's wrong, but I can't stop now

Don't you wanna be my little problem
Slide up next to me any time
Don't you wanna be my little problem

I never had a problem till
I knew you'd try to solve it
Well I, I never had a problem
Don't you, till I told you, yeah

The feeling you're getting is downright depressing
Do you foresee a way out for me
I never had a problem till I met you try to solve 'em
Oh, I never had a problem, don't you wanna

Don't you wanna be my little problem
Slide up next to me any time
Don't worry, I can see my little problem
Don't you wanna be my little
My, my, my little problem

My little problem
My little problem
My little problem
