

Delirium Tremens

The Restarts

Enzyme imbalance from too much booze
Sanity and logic is what you lose
Hair trigger temper and choking thirst
I feel like my kidneys are gonna burst

Sleep deprivation - substance abuse
The beast within - just been set loose

Shakey and weak with blood red eyes
Delirium tremens riddle your mind
Relentless bombardment of chills and flashes
You just downed a beer full of butts and ashes

Sleep deprivation - substance abuse
The beast within - just been set loose

Shakey and weak with blood red eyes
Delirium tremens riddle your mind
Relentless bombardment of chills and flashes
You just downed a beer full of butts and ashes
But you gotta face the cold hard facts
Your nervous system is under attack

In come the spirits two-litres and tins
A session's the cure you'll do it again
Your hand grows steady with each sip
As the golden medicine pours over your lip
