

Legacy of Bigotry

The Restarts

At high school, pre-school and from the cot,
A child only learns what they've been taught
The problem lies within education
Of social, racial integration
Bigotry's a virus that plagues every race,
A social affliction, a slap in the face
Vilify a race to justify pride,
It's the fabric of war racial genocide

Passed down through generation to young from old
Adopting the hereditary racist mould
Breastfed and nurtured with ignorance and hate
The afflicted generation has sealed its fate
