

Walk Away

The Restarts

Now I see you think you're making sense
Got no slack for your ignorance
Get away as you're being a pest
Got no time for your BS
Yeah what ever and the same to you as you talk and try an tell
me what to do
Look for someone else to distress make my move and I exit left

All I did was walk away

It's a time and place that you exist
Out of sync like a royalist
Now I think its time we called it quits
Got no software for your user bits
You're a fake and a lousy git
Don't know how you get away with it

All I did was walk away
