Alive In The City

The Riot

Patronize me, crucify me, throw me in your hole Suicide see, can't control me, the only thing you know Try to break me, try to make me, turn against my soul Try to burn me, try to turn me, against the things I know

I know you, you're alive in the city, never bring me down I'll turn you from pride to pity, your feet ain't on the ground

Down get down Running from the man gonna keep me running Now you've found Never gonna get what you want from money Down you'll see, alive in the city where the blind man see Dawn this town, never gonna change your history

Classify me, pacify me, stab me with your smile Try to hate me, desecrate me, keep me in denial You're hesitating, I'm penetrating, deep inside your mind Infiltrating, eviscerating, everything I find

I found you down in the city, now it is your time I've damned you, and all you're pity, finished with your lies

Damn this town, never gonna lose your history

Classify me, pacify me, you'll see Crucify me, patronize me, you'll see Try to break me, try to make me, you'll see Try to turn me

Down you'll see, living like a pig in misery Down get down, spitting in the face of you and me
