You're All I Need Tonight

Somewhere she's waving at me At the corner of the bar But I find the distance too far To have me get up and see Could it be due to my smile Maybe I'll just hang out awhile

You're all I need tonight Come on save it for tonight You're all I need tonight

What you saying

Is the music up to high Why don't you come come a little closer Put my finger on your surprise Your someone's ordinary dream Just a dish of pure delight Now if I can't hold my ground Have someone bring my car around

You're all I need tonight Come on save it for tonight You're all I need tonight

You're all I need tonight Come on save it for tonight You're all I need tonight The Riot
