

Just One Girl

The Robot Ate Me

There is just one girl I love,
And she is smiling next to me.
Will she come back next week
And spend some time with me?
I never thought that love was real
Until it came to me.

There is just one girl I love,
And she is smiling next to me.
Will she come back next week
And share some love with me?
I never thought that love was real
Until she came to me.
