

## Just Like Fire Would

The Saints

One night in a motel room  
eyes cast like steel  
I drank the wine that they left on the table  
I knew tomorrow was too far  
I smoked my last pack of foreign cigarettes  
I stay only to survive  
the night was dark & the land was cold  
it's frozen right to the bone  
just like fire would  
I burn up  
just like fire would....  
500 miles I have gone today  
tomorrow it's 500 more  
outside my window the world passes by  
stranger than my dreams  
just like fire would  
I burn up  
just like fire would....  
I go to work & I earn my money  
the sweat it falls to the ground  
I see you now but we may never meet again  
the ice is covering the ground  
One night in a motel room  
eyes cast like steel  
I drank the wine that they left on the table  
I knew tomorrow was too far.....
