

Big Bird

The Samples

All night long it seems I'm waiting
To get up with all the others in my head
The bell rings loud enough with a light that opens up the sky
And a bird looks down on me
I begin to tremble
The wind so cold
Taking off to a new place
In this big green sky
Looking up into a big green sky
As he flies away
Looking up into a big green sky
As we sail across the valley
Looking down on the places we've gone
It's like jumping on a horse
And riding away
What if my friends could see me
Riding atop a big bird
As we sweep across the clouds in
A big green sky
As we begin descending
A smile says something to me
Maybe it's time for a landing
I don't want to land
Then he flies away
And waves goodbye
Fly away
Looking up into a big green sky
As he flies away
Looking up into a big green sky
As he flies away
Looking up into a big green sky
As he flies away
Looking up into a big green sky
