

## Taxi

## The Samples

We drink from the same glass  
We share the same past  
A long time ago  
You told me that I should know

It's hard no matter what you do  
My guard was always up for you

The job is never done  
A kiss just for fun  
Our flood waters are gone  
Our blood brothers are strong

It's hard no matters what you do  
My guard was always up for you

I'll slip you underneath  
Between the grip of your teeth

It's hard no matter what you do  
My guard was always up for you
