

# That's What She Said Last Night

The Saw Doctors

You remind me of someone that I met somewhere else  
It's not the color of your eyes, It's the way you wear your hair  
It's so hard to hear you above this Disco noise  
But I wasn't talking, I was saving it for the boys

That's what she said last night  
(That's what she said, that's what she said)  
Would you prefer if I turned out the light?  
(That's what she said, that's what she said)  
That's what she said last night  
(That's what she said, that's what she said)  
You're the best and you make me feel so right!

Well, I saw her leavin' could have told you that she would go  
(Without you)  
You can follow her out but there's not a lot you can do  
If you get in her way, she'll just pass you by in a blur  
Cause she's heard it all back, everything you said about her

That's what she said last night  
(That's what she said, that's what she said)  
Would you prefer if I turned out the light  
(That's what she said, that's what she said)  
That's what she said last night  
(That's what she said, that's what she said)  
You're the best and you make me feel so right!

Yeah, yeah, yeah, yeah, yeah

Repeat x 4: Would you please one more time?  
(Go on outta that, we don't believe you)

Repeat x 4: She said,
