

# Blinded By The Sun

The Seahorses

How would you feel if I was to kneel right down  
At your feet? Right now  
Is the way it's going to be from now until forever  
Let's have less of getting clever with me

Who would you blame for blowing the flame right out  
Is it me? There is no doubt  
I can do what I want to do from now until forever  
Let's have less of getting clever with me

You're wasting your time and my time as well  
L-l-living a lie, I guess that time will tell  
You're making excuses for the things you've never done  
Walking in circles, blinded by the sun  
Blinded by the sun

Who would you blame for blowing the flame right out  
Is it me? There is no doubt  
I can do what I want to do from now until forever  
Let's have less of getting clever with me

You're wasting your time and my time as well  
L-l-living a lie I guess that time will tell  
You're making excuses for the things you've never done  
You're walking in circles, blinded by the sun  
Blinded by the sun

I don't mean to sound unkind to you  
You'll just have to go and find something else to do  
And don't ask me what went wrong  
The list goes on and on and on and on  
The list goes on and on and on and on  
The list goes on and on
