

# Future Road

The Seekers

If I had the power of the people and I ruled the world  
After all that I've seen  
And the places I've been  
Nothing would be better than to make a change here or there  
It's easy to say  
But there may be a way

Stand all the people in one line  
Paint 'em all in green in the sunshine  
Take some chances  
Come on let's find the answers

We may stumble never crumble  
Face tomorrow everyone  
All together share the load  
If we ride our dreams down future road  
We can ride our dreams down future road

Talking 'bout the power of the people not a perfect world  
There's a dream we can choose  
One we never will lose  
Take a look at all the hopes of every little boy and girl  
We can see through the haze  
Weapons melting away

Turn 'em all into a fun ship  
Floating down the river of friendship  
Sail forever  
You and I together

We may stumble never crumble  
Face tomorrow everyone  
All together share the load  
When we ride our dreams down future road  
We can ride our dreams down future road

Melting away making a change  
Easy to say must be a way  
If we stand all the people in one line  
Paint 'em all in green in the sunshine  
Take some chances  
Come on let's find the answers

We may stumble never crumble  
Face tomorrow everyone  
All together share the load  
If we ride our dreams down future road  
When we ride our dreams down future road  
We can ride our dreams down future road
