When I said that ain't my style I only waited for a while When it finally came along I close my eyes and it was gone

So feel free go steal it round A revolution ain't my charm And if I sing your happy song Please don't tell me I am wrong

Close my eyes and I am gone (close my eyes)
And if I stare at the sun I find there's only one
Close my eyes and I am gone

So when I said that it was you You know I meant it from the heart Such a shame that when we're through You'll say it didn't even start

So I says I like your smile
I only saw it for a while
And though you swore it would stay long
I closed my eyes and it was gone

Close my eyes and I am gone (close my eyes and I am gone)

Close my eyes and I am gone (close my eyes) And if I stare at the sun I find there's only one Close my eyes and I am gone

So on the day when I collide Is on the fateful day I ride Pray I somehow slip away And slip into another day

Close my eyes and I am gone (close my eyes and I am gone)

Close my eyes and I am gone (close my eyes)
And if I stare at the sun I find there's only one
Close my eyes and I am gone

Well if I stare at the sun I find there's only one Close my eyes and I am gone And if I stare at the sun I find I just begun Close my eyes and I am gone
