

Estranged

The Slackers

I ran away to a place you could not go Somewhere not even my eyes would Not betray or ready show I've resigned to live my life this way Or else regretfully convey What's already taken hold She's really become estranged of heart Knew right away right from the start As on a stage you play the part You know you know you know Since we've become estranged Of heart

When I came back to chilled me to the bone The streets rolled up as tears we draw Casting relief as if to stone She's like a page from out, of good old pompeii — your coffee cup To walk a mile is to say She's really become estranged of heart Knew right away right from the start As on a stage you play the part You know you know you know Since we've become estranged Of heart

It felt like treason You had your reason for turning your back in the afterglow I thought that you outta know I thought that you outta know

Two weeks together And that lasts forever You know it's so sad that you have to go I thought that you outta know I thought that you outta know I thought that you outta know I thought that you outta know

She's really become estranged of heart Knew right away right from the start As on a stage you play the part Since we've become estranged of heart Knew right away right from the start As on a stage you play the part You know you know you know Since we've become estranged Of heart
