

# Self Medication

The Slackers

My favorite medicine is  
Whiskey and weed  
And I free associate at  
Sonic speed

'Cause boredom and apathy get  
So sublime,  
Visions of tragedy and  
cold dollar signs

Self medication, self medication.  
Everyone knows it's just a  
matter of time

My education was my own  
self deprecation and it's  
waiting in shadows in the  
back of my mind.

Whispering melodies and  
tainting the world i see with  
visions of tragedy and  
s's and lines (probably not right)

Self medication, self medication.  
Everyone knows it's just a  
matter of time

Self medication, self medication.  
Everyone wants to have a  
little of mine.

From boredom to blasphemy i'm  
acting so manically but  
it supports the falicy that  
there's something to find.

Can i express myself? i  
know its bad for my health but  
its filling this meaninglessness  
with riddles and rhymes

So maybe a pleasure trip to  
Foreign seas  
would make the days easier you  
spend with me

Or fancy casino trips that  
rob you blind,  
we're counting in poker chips and  
bottles of wine

Self medication, self medication.  
Everyone knows it's just a matter of time

Self medication, self medication.  
Everyone wants to have a little of mine.

Self medication, self medication.  
Self medication, self medication.  
Self medication, self medication
