

Into The Clouds

The Sound of Arrows

I'm gonna work my way out of the sun
I'm gonna be someone
I know who I am but right now (now)
I don't think that I do

We could leave this place
and fly far away
Let's escape this town
the streets and the cars and the crows
and into the clouds

And nothing can stop us, nothing forever
Nothing can stop us, if we stick together

I might be dreaming but I think I believe
I might be seeing things
that aren't quite real but right now (now)
I don't care if I do
I didn't mean those words that I said back then
I'm sorry
I will never ever be that high again
I promise that I wont

And nothing can stop us, nothing forever
Nothing can stop us, if we stick together
And nothing can stop us, nothing forever
Nothing can stop us, if we stick together

And now it's taking off
The journey begins
It's time to leave this place
the streets and the cars and the crows
Then into the clouds

To some place far away
For away forever ever stay the same
No never never
Straight to sky and, then into the clouds

It's far away
Forever ever, stay the same
No never never
Straight to the sky, then into the clouds

And nothing can stop us, nothing forever
Nothing can stop us, if we stick together
And nothing can stop us, nothing forever
Nothing can stop us, if we stick together
