## **Helicopters**

The Stills

And how your heatwave ran Through our snow black fields And we dropped our young To a ragtime feel

And it's been ten long weeks And there's still no word Our Arctic Graceland And the whale fat burn

My moon's a naked cold star Why do you take this so hard?

So keep this song
Till you catch diseases
And wait them out
Till this tundra freezes

My moon's a naked cold star Why do you take this so hard?

And how your heatwave ran Through our snow black fields

My moon's a naked cold star Why do you take this so hard?

Helicopters are chasing Animals through the fields Helicopters are chasing Our spirits into the sea

Helicopters are chasing Animals through the fields Helicopters are chasing Our spirits into the sea
