

# Until The Music's Over

## The String Cheese Incident

My heart's like a stopped clock  
Twice a day it's right on time  
My heart's like a stopped clock  
Twice a day it's right on time

Let's dance until the music's over

My hands are too empty  
They need something to do  
My hands are too empty  
Let me fill them up with you

Let's dance until the music's over  
Let's dance like there's no tomorrow

If you could walk along this road I walk alone I'd walk alone with you  
If you could see inside my heart of glass you'd see how much I see in you  
When all of this is over we'll be standing in the dark just me and you  
Until the music's over

All we have  
Is all we have, we need to know  
Hide with me  
Before the pink dawn light begins to show

Let's dance until the music's over  
Let's dance like there's no tomorrow

If you could walk along this road I walk alone I'd walk alone with you  
If you could see inside this heart of glass you'd see how much I see in you  
When all of this is over we'll be standing in the dark just me and you  
Until the music's over

My heart's like a stopped clock  
Twice a day it's right on time
