

Tidal Wave

The Sugarcubes

The barometer is falling down, I feel so sultry
Something is simmering and boiling inside me
If I ignore it and squeeze out laughter
I charge up with a typhoon, hurricanes and storms

I just need the diesel, I just find the smell,
I just sniff it and I can feel the harbour just close by,
I just try to sniff the diesel but I can't, I just can't get enough,

Theres danger, danger!

A tide with an undertow, the sea is swelling
Impatience makes me foam
A wave inside me forces out big words
They splash and sprinkle
An angry torrent breaking loose, a flush or rushing joy

The diesel, just makes me feel,
It just fills my veins
I don't know why
it just does

The diesel is so....

It shouldn't gush out

It just fills me up

Don't want it to be fussy

I can't have a cigarette

It shouldn't gush out

It just fills me up
if i have a cigarette, it would make me go boom!

And I can't help it, I'm exploding again
I'm calling weather stationNnomad
And satellite Nimbus
It's a blizzard inside me, a bomb ticking!
This is the tidal wave

The diesel!

Here comes the tidal wave, ho-ho!

The diesel!

This is the tidal wave

The diesel!

Here comes the tidal wave.
