The Suicide Machines

Didn't I express my regrets about the way things are and I think I might not be taken this too far this time I hope that you can understand this time I hope that you can see it Didn't I tell you everything about me didn't I show you can you feel it got so many thoughts and words inside my head inside my head Didn't I do enough to make you feel so sad and you know I'm sorry about the fights we had so long I'm sorry everything went wrong goodbye you'll never have to see me

Didn't i tell you we'd never last forever cuz we change our minds like changes in the weather now it's all over even though we've come so far we've come so far

Everything went wrong emotional feed back we're so confused everything's gone so wrong with my heart in my throat I know it's time t to grow up

I know that you and I would never last and all this time it went by much to fast I never listened to a word they said remember me and don't cry cuz
