

A Stare Like Yours

The Thermals

You call the shots
It's in your face
You don't have to sweat
You call the shots
You learn to forget
What brought your stare

You call the shots
It's in your face
You don't have to sweat
You call the shots
You learn to forget
It's in your face
You know what you've got
You call the shots

You open your eyes
And stare into mine
A stare like yours
Is hard to find
It's ultraviolet
You close your eyes
And breathe
I feel your lips
You hit the switch

You need the touch
It's in your face
You show it so well
It's in your face
You don't have to tell
Your stare's got
No secrets left

You need the touch
It's in your face
You show it so well
It's in your face
You don't have to tell
You need the touch
You power true
And I power you

You open your eyes
And stare into mine
A stare like yours
Is hard to find
It's ultraviolet
You close your eyes
And breathe
I feel your lips
You hit the switch

Well you know
That you're on
You're alright
You can lift your head

You won't have to try
When you have control
You defend
When you don't have control
You pretend
