

My Little Machine

The Thermals

You've got your sights set
Programmed, you'll never tell
I see a blank map
I can see no straight path

You can wire spin
You can make gold again
You can dial it in
You can take it all off again

Be my little machine
You can pinpoint for me
I need you locked in
You've got your sights set
Programmed, you'll never tell
I see a blank map
I can see no straight path

You can wire spin
You can make gold again
You can dial it in
You can take it all off again

Be my little machine
You can pinpoint for me
I need you locked in
Programmed, you'll never tell

No emergency
No alarm test
You've got the mind
So you might as well take the rest

You can wire spin
You can make gold again
You can dial it in
You can take it all off again

Be my little machine
You can pinpoint for me
I need you locked in
Programmed, you'll never tell
You can dial it in
You can take it all off again
