

Forever Together

The Tiger Lillies

Forever we will be together beyond the grave
In our grave we'll lie side by side through hate and pride we will die
Forever we will be together beyond the grave
Though my hate for you it grows there is no place I can go
Forever we will be together beyond the grave
Each thought and feeling that you feel makes me anguished want to squeal
Forever we will be together beyond the grave
Each habit, predilection, twitch wants me to call you a fucking bitch
Forever we will be together beyond the grave
But then if I cut your throat on my own corpse I will gloat
Forever we will be together beyond the grave
Oh how I wish you I could kill but then my own blood I would spill
Forever we will be together beyond the grave..... Beyond the grave
