

# The Alpha The Omega

## The Tony Danza Tapdance Extravaganza

I hope you think of me now (2x)  
So when I die take my body and mind  
Put it in the ground  
Where words won't even make a sound

The alpha the omega  
From the very start to the end  
Nothing will last can't live the past  
From a newborns eyes to man's tragic demise

The alpha the omega  
From the very start to the end  
Nothing will last can't live the past  
From a newborns cry to man's final goodbye

No way out just face the facts  
Don't doubt and just relax  
Our words mean nothing  
It's all pointless  
When it's all said and done  
No need to run  
You live and you learn  
Life runs it's course  
And then you burn

The alpha the omega  
From the very start to the end  
Nothing will last can't live the past  
From a newborns eyes to man's tragic demise

The alpha the omega  
From the very start to the end  
Nothing will last can't live the past  
From a newborns cry to man's final goodbye  
Then the world we know will close our eyes  
And in this fall our words will die  
And then we all fall into open earth  
There is no legacy left  
When our reservation with death  
Has closed our eyes for an eternal lonely life

And then we all fall  
Into open earth  
Our words will die  
Into open earth  
And then we fall  
Into open earth  
Our words will die  
Into open earth  
And then we fall  
Into open earth  
And then we fall  
Into (With our words)  
Open earth  
And then we fall  
Into (With our words)  
Open earth

And then we fall  
Into (With our words)  
Open earth  
And then we fall  
Into
