

Nothing to lose but our minds

The Treatment

When I dig my heels in
You're moving out 'cause I'm moving into your world
Another domain, a different way, but we're getting there
Time, is ticking away
You want me out, but I gotta stay in your world
You may disagree, but what's good for you is good for me

Nothing to lose but our minds,
Let it all go
(let it all go)
Nothing stays the same
Nothing to lose but our pride,
We already know,
(yeah we all know)
Nothing stays the same

No, you can't bury me
I'm not the same as the enemy in your head
You may disagree, but what's good for you is good for me
Time, is ticking away
You want me out, but I gotta stay in your world
You may disagree, but what's good for you is good for me

Nothing to lose but our minds,
Let it all go
(let it all go)
Nothing stays the same
Nothing to lose but our pride,
We already know,
(yeah we all know)
Nothing stays the same

You know if we could only work together
The all around us would be so much better
Hey I want you to feel it
Now, I want you to see it, come on

Nothing to lose but our minds,
Let it all go
(let it all go)
Nothing stays the same
Nothing to lose but our pride,
We already know,
(yeah we all know)
Nothing stays the same

We got nothing to lose
Let it all go,
(nothing stays the same)
Oh yeah
(let it all go)
