Love Is The Real Thing

Love is it the real thing? Give me the real thing love Love is it the real thing? Give me the real thing love

I've been trying to leave you alone But I get so lonesome on my own I keep checking my cell phone For missed calls from your mother's home

I guess you could say that I'm desperate

Love is it the real thing? Give me the real thing love Love give me the real thing The real thing Love

I'm not crazy I'm alone I wait for friends I used to know You've got to be pretty cold To lead me on and let me go In love

Everything feels like it's out of control I guess you could say that I'm out of it

Love is it the real thing The real thing The real thing Love

If you don't love me let me know Don't lead me down a dead end road You're raking me over the coals I guess that I'm a fool in

Love is it the real thing? The real thing love Love give me the real thing The real thing love Love give me the real thing The real thing love Love is it the real thing I guess you could say that I'm desperate enough

The Trews
