

# Our love will still be there

The Troggs

I believe that in years to come  
When the mountains have crumbled to dust  
And all the oceans have all run dry  
And the cars in the street turn to rust.

Our love will still be there  
Our love will still be there.

When the rain from the sky don't fall  
And the stars they don't shine at night  
When all the nations have made their wars  
And the soldiers have all had their fight.

Our love will still be there  
Our love will still be there.

I'll always love you  
No matter what comes in our path  
I'll always need you  
Like I have done in the past  
I'll always be there  
In your ups and in your downs  
I'll even love you if the world stops going 'round.

So when the days and the nights are joined  
And the baby does no longer cry  
When man has been to the ocean depth  
And reached out his arms for the sky.

Our love will still be there  
Our love will still be there.

I'll always love you  
No matter what comes in our path  
I'll always need you  
Like I have done in the past  
I'll always be there  
In your ups and in your downs  
I'll even love you if the world stops going 'round.

So when the days and the nights are joined  
And a baby does no longer cry  
When man has been to the ocean depths  
And reached out his arms for the sky.

Our love will still be there  
Our love will still be there  
Our love will still be there  
Our love will still be there.
