

Last Night In Town

The Twilight Singers

Whenever you're here you're alive
The devil says you can do what you like
Come what may, come what might
You'll see me there

They've come to bury you, child
And there's a man on the loose in your eyes
But should you stay and should you fight
You'll see me there

Dreaming, dreaming
Dreaming true and true
Screaming, O my lord
When the scheme's undone
One will survive

Get in line
Take your broken number
I'll wait for you
Cause baby I've
Come to take you under
Your number
I thought it up

It's easy, easy, easy through and through
Screaming, O my lord
And it's easy when there's
Nowhere to hide, in me
Love, take me now
You'll see me
In your disguise

I promise to be with you till the end
Or somewhere near there
I promise to be with you till the end
At least until you're dead
